## Star Emotions!

Leo the Lion loves looking at all the different stars in the sky.  
Can you act out the different stars?

Use your body and your face to become a:

- Happy Star
- Sad Star
- Angry Star
- Excited Star
- Scared Star
- Sleepy Star

What other stars can you think of? Can you act them out?

## Rocket Dynamics

Find something to make a noise when the rocket blasts off:

- a bottle with pasta in
- a saucepan and wooden spoon
- your body and voice

Countdown from 10 and "Blast off!" by making your sound loudly.

Conduct your rocket on a journey...

- As the rocket goes higher or further away, make the sound quieter
- As the rocket comes back down or close, make the sound louder
- As it lands, make the sound stop

You could sing a song or play music from a phone, controlling the volume during the rockets journey...

## Make your own Telescope!

### You will Need

- ☑ 2x toilet roll or kitchen roll inner tube
- ☑ Stickers, pens, pencils, anything to decorate!
- ☑ Tape

### Instructions

#### The Inner Tube:

1. Cut one of the kitchen roll tubes lengthways all the way from one side to the other
2. Wrap one edge over the other making a smaller tube

#### Assembly:

1. Slide the inner tube inside the other kitchen roll tube
2. Let the inner tube expand inside the outer tube
3. Once the inner tube expands to the right size, tape each end to secure in

#### Decoration:

- Decorate the outside of your telescope with whatever paints, glitter, crayons you have!

Take your telescope on an adventure... what can you see..
